GEORGIA SOAP COMPANY

NATURAL PRODUCTS FOR A HEALTHY LIFESTYLE

Our Story

Kevin and Bonnie Reheman founded Georgia Soap Co. in 2009 when their daughter developed a bad case of eczema.

To combat the eczema, they used many products that claimed to be “all-natural”, but, upon further research, were not and harbored many harmful ingredients.

Through trial and error, they eventually created a soap that treated their daughter’s eczema as well as the skin problems of their friends.

After seeing and hearing the positive results of their products, Georgia Soap Company was created.

We Believe in “doing the right thing” by our customers, and being honest about the ingredients we use in our body products. We strive to make truly natural products for our customers who want and deserve a healthy lifestyle.

Because of our beliefs, our customers can trust us and know we will treat them the way they deserve.

Our Products

We produce a wide variety of body products and soy candles with natural and wholesome ingredients.

Our Body Products

- *Natural Bar Soap* (Size: 5.25 oz.): Our soap is individually crafted by hand without harmful detergents, preservatives, artificial fragrances, and animal-, petroleum-, or GMO-based ingredients.
- *Natural Liquid Hand Soap* (Size: 9 oz.): Our natural liquid hand soap is produced in small batches, using a natural hot process without the use of sulfates, preservatives, artificial fragrances, petroleum, or animal based ingredients.
- *Body Butters* (Size: 4 oz.): Our body butters contain as much as four times the amount of intensive moisturizing agents than competitor brands. We use unrefined shea butter, coconut oil, glycerin, green tea (anti-oxidant), and essential oils to create the best butter on the market. It’s especially gentle for those with skin and respiratory sensitivities.
- *Natural Balms* (Size: .25 oz.): Our natural organic balms are wonderful in their simplicity with minimal ingredients. Scented lightly with essential oils, and sweetened with raw honey, they are great for lips, cuticles, and burns.

- *Natural Lotions* (Size: 9 oz.): Lightly scented with essential oils, our lightweight lotions are deeply moisturizing as they are made with coconut, sunflower, and apricot kernel oils.
- *Bath Bombs* (Size: 6 oz.): Our giant-sized bath bombs are nearly 3 inches in diameter, and are the perfect end to the day. We use aromatherapy, herbs, exotic salts, and a piece of our natural soap to soothe sore muscles and spirits.
- *Fizz Dust* (Sizes: 8 oz./16 oz.): Fizz Dust & Chunks are a magical mixture of fizzing water softeners, Pink Himalayan Salt, Mediterranean Sea Salt, Epsom salt, herbs, essential oils, and chunks of our natural soap. Use Fizz Dust & Chunks to create an aromatherapeutic spa bath, which will leave skin invigorated.

Our Candles

- *Soy Candles and Melts* (Sizes 14 oz./4 oz.): Our clean-burning soy candles are made using lead-free wicks and phthalate-free fragrances, so there is no need to worry about soot build-up or headaches! Our 14 oz. candles to burn for 70-80 hours and our travel tins to burn for 20-25 hours.
